

TITLE: CLIMABALANCE® CLINICAL APPLICATION TEST

**Performed by: Private lecturer Dr R. Brehler, Clinic and Polyclinic for Skin Diseases
at the University Hospital Münster**

This report documents a clinical application test of ClimaBalance® duvets and mattress pads for five patients with atopic eczema.

After evaluating the questionnaires and complaint logs, the author concludes that “a positive effect of ClimaBalance® duvets can be found as regards the characteristic of the eczema and intensity of itching.” Despite the low number of test persons, the examination reveals that “the use of ClimaBalance® beds for patients with atopic eczema can be beneficial.”
